Respiratory Protection Equipment (RPE) - OSHA Standards

Duration	25 Minutes
Target group	Oil & Gas Industry 29 CFR 1926.451
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Explain the legislation, roles and responsibilities relating to RPE LO2: Explain how to select appropriate RPE for a given task LO3: Identify the various types of filters and their associated use LO4: Identify the various types of RPE used offshore LO5: Describe the factors to be aware for ensuring properly fitting RPE LO6: Explain how to correctly maintain, store and dispose of RPE
Contents	This course is available in the following languages: US English; Spanish; Turkish; Arabic. This course will help you to understand the importance of proper Respiratory Protective Equipment (RPE) use in hazardous workplace environments. You will learn about legislation, maintenance, the fit of various types of RPE, and be able to select adequate and suitable RPE for a given task or situation. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or “unscheduled” refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.
Exam	The assessment is taken during the course and is within the expected duration.
