Dropped Objects - OSHA Standards

Duration	30 minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Define what dropped objects are and where they may occur LO2: Describe the dangers of dropped objects LO3: Describe how to reduce or prevent the impact of dropped objects LO4: Outline your employer's responsibilities for controlling dropped objects LO5: Understand your responsibilities for controlling dropped objects
Contents	This course is available in the following languages: US English; Turkish; Mexican Spanish. The aim of this course is to inform you about where dropped objects may occur and the associated risks. You will find out what your employer must do to control risk and offered guidance on the steps you can take, too. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or "unscheduled" refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.
Exam	The assessment is taken during the course and is within the expected duration.
