Hand Safety - OSHA Standards

Duration	25 minutes
Target group	Oil & Gas Industry 29 CFR 1910.138
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Understand the importance of hand safety LO2: List the common causes of hand injuries LO3: Describe work related hand and finger injuries LO4: Explain the different treatments for hand and finger injuries LO5: Describe the hierarchy of controls LO6: Explain how to avoid hand injuries during lifting activities LO7: Explain how to select, use and care for gloves
Contents	The course is available in the following languages: US English; Turkish; Mexican Spanish. This course has been designed to provide an awareness of how, and why, a wide variety of hand related injuries can occur in the workplace. You will also learn how to treat specific injuries, along with practical advice on how to prevent them from occurring in the first place. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or “unscheduled” refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.
Exam	The assessment is taken during the course and is within the expected duration.
