360° Safety

LBSRDL022

Helicopter Safety

Duration	15 Minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Understand how aviation is regulated LO2: Describe helicopter systems and equipment LO3: Describe the basics of aircraft maintenance and inspections LO4: Describe the different types of aircraft crew, their qualifications and training LO5: Understand a passenger's role in helicopter safety
Contents	Helicopter safety has a good record in the UK, but accidents and fatalities still occur. As helicopters operate in often harsh conditions, particularly in the North Sea, safety is a top priority. Therefore, strict laws and regulations are in place.
Exam	The assessment is taken during the course and is within the expected duration.
