

## IADC WellSharp Supervisor Level Well Control (Surface)

---

**Duration** 5 days

---

**Target group** The IADC WellSharp “Well Control for Drilling Operations – for Supervisors” course has been designed for toolpushers, drilling engineers, drilling supervisors, superintendents, drilling foremen, company men and others with a requirement to hold an accredited well control certificate at Supervisory level. The training is role-specific and is focused on well kill procedures.

---

**Prerequisites** Prior IWCF or IADC certification at Driller or Supervisor Level is recommended but not mandatory. The training is role-specific so previous experience in a supervisory role during drilling operations is assumed. Please contact us to discuss candidate suitability if you have any doubts or queries.

---

**Objective** The IADC WellSharp Supervisor Level Well Control course is essential training for those working in wellsite supervisory roles and for office-based personnel that are primarily involved in the operational decision-making process and/or well design. The course aims to build on the Driller Level course content (including kick detection and shut-in) and focus on more complex aspects of well control and well kill methodology. The course is delivered over 5 days through presentation of a series of interactive lectures supported by videos and animations, supplemented by a classroom workbook and further self-study exercises and practical work on a drilling simulator.

---

**Contents** Under the WellSharp programme and unlike IWCF training, IADC Supervisor Level candidates are taught completely separately from IADC Driller Level candidates and will not be in a mixed class. The course ends with an online assessment on the final day which will be administered by IADC and invigilated by an independent proctor.

---

**Exam** - 3-hour online assessment  
- Practical assessment

Successful completion of the course and a pass mark of 70% or above in the practical simulator assessment and the online written assessment will result in IADC WellSharp Driller Level certification which is valid for two years.
