---

**Target group** Oil & Gas Industry  
29 CFR 1910.1096

---

**Prerequisites** No prerequisites are required to sit this course.

---

**Objective** LO1: Give an overview of radioactivity  
LO2: Describe NORM  
LO3: Give an overview of the health and safety issues relating to NORM  
LO4: Explain where NORM is found  
LO5: Give an overview of legislation and employer responsibilities with regard to NORM  
LO6: Explain how NORM is detected  
LO7: Outline the precautions that should be taken when working in an environment where NORM may be found

---

**Contents** The course is available in the following languages: US English; Spanish. The aim of this course is to provide you with an understanding of the legal requirements, methods and responsibility for managing radioactive waste in the oil and gas industry. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or "unscheduled" refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.

---

**Exam** The assessment is taken during the course and is within the expected duration.
