IADC WellSharp Oil & Gas Operator Representative Workover & Intervention

Duration	5 days
Target group	The course has been designed for well site supervisory and office-based personnel involved in the operational decision-making process for well control and/or involved in design of well barriers. For example, Wellsite Leaders/Company Man, Company Representative, All Superintendents, Production/Company Engineer, Consultant, General Desk Engineer/Specialist/SME, and other individuals that are not direct operators or supervisors of equipment and require a broader scope of knowledge beyond their product line.
Prerequisites	Prior IWCF or IADC certification is required. The training is role-specific so previous experience is assumed. Please contact us to discuss candidate suitability if you have any doubts or queries.
Objective	The IADC WellSharp Oil & Gas Operator Representative Workover & Intervention course is essential training for those primarily responsible for overseeing coiled tubing, snubbing, wireline, and/or workover operational processes of well control.
Contents	<p>The course duration is 36 classroom hours plus an IADC assessment (4.5 days of training and an exam in the afternoon of day 5). Training is delivered through presentation of a series of interactive lectures supported by videos and animations, supplemented by a classroom workbook and further self-study exercises, and practical exercises on a simulator.</p> <p>The topics covered during this training include the following:</p> <ul style="list-style-type: none">- Well control risk management and assessment- Well control principles and calculations- Well control barriers- Influx fundamentals- Gas characteristics and behavior- Completions and workover fluids- Well control procedures and practices- Surface and subsurface wellbore equipment- Coiled tubing pressure control equipment- Wireline pressure control equipment- Snubbing pressure control equipment- Special situations and complications- Industry and government standards and requirements- Ancillary equipment
Exam	Successful completion of the course and a pass mark of 75% in the online written assessment will result in IADC WellSharp certification which is valid for two years.
