

OTC675

API RP 2D Qualified Rigger Training (16-hour)

Duration	2 days
Target group	Personnel who have had little or no training and/or experience in rigging and lifting operations and wish to gain an introductory certificate in rigging and lifting operations
Prerequisites	None
Objective	Upon the completion of this course, candidates will be able to: Knowledge Objectives: Rigging Hardware - Identify of types and application of rigging hardware to include: blocks; sheaves; hooks/latches; rings, links, swivels; shackles; turnbuckles; spreader and equalizer beams; cable clips; pad eyes; eyebolts; and wedge sockets/termination - Describe the application of each piece of rigging hardware. - Describe the application of each piece of different types/variations of basic rigging hardware under discussion - Describe the purpose and proper use of different types/variations of basic rigging hardware under discussion - Describe the purpose and proper use of different types/variations of basic rigging hardware under discussion - Describe how to properly maintain hardware - Describe how to properly maintain hardware - Describe afle and proper storage techniques/practices for each piece of rigging hardware - Describe Sing application of slings and material to include: wire rope; synthetic; chain; and two-, three-, and four-leg bridle - Describe Sing application (configuration and function); inspection/rejection criteria; angle and load tension; handling and storage - Describe function, applications, and safety precautions of hitches (vertical, choker, basket) - Describe function, applications, and safety precautions of hitches (vertical, choker, basket) - Describe function, applications, and safety precautions of hitches (vertical, choker, basket) - Describe when to use and how to use - Describe when to use and how to use - Describe affer and proper storage techniques/practices for all rigging hardware Procedures and Precautions: - Describe load control/taglines - Describe the effect of the sling load at different sling angles - Describe safe and proper storage techniques/practices for all rigging hardware Procedures and Precautions: - Describe the procedures and inspection for each type of personnel transfer equipment. - Identify unbinding loads - Understand personnel

	- Identify softeners (e.g. wear pads) - Understand attaching unused sling legs - Understand how to improve sling efficiency - Describe turning, securing, and placement of loads
	Rigging Basics - Identify pinch points/body positions. - Identify personal protective equipment (PPE) - Understand proper hand signals/radio communications
	Performance Objectives: - Demonstrate pre-lift rigging hardware and sling inspections (wire rope slings, synthetic slings, shackle, hook, load block, chain fall, come-along, and lift points) - Demonstrate different types of rigging hitches (vertical, basket, choker, 2/4 part >60) - Demonstrate use of proper hand signals
Contents	This 2 day (16 hours) course will cover the following topics: - Rigging Hardware - Slings - Procedures and Precautions - Rigging Basics
Exam	Delegate necessary skills shall be evaluated through written, practical, and oral assessment. For successful completion, delegates must attain a minimum satisfactory score of 75% on a closed-book written assessment and 100% on all practical assessments in accordance with the latest edition of the API RP 2D standard.
