- LO12: Describe the importance of scaffold inspections

Contents

The course is available in the following languages: US English; Spanish; Bahasa Malay; Indonesian; Thai; Turkish.

The aim of this course is to give you an awareness of scaffolding components and procedures. You will learn about the basic tools used to construct scaffolds, the personal protective equipment required, the roles and responsibilities associated with scaffolding work, and the importance of inspections.

Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or "unscheduled" refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.

Exam The assessment is taken during the course and is within the expected duration.
