

ITC013

Authorised Person: High Voltage (Industrial and Commercial) Refresher

Duration 3 days

Target group Experienced HV personnel refreshing knowledge on regulations, safety rules, and system operations.

Prerequisites There are no prerequisites for this course.

Objective

- Continued compliance with legislation.
- An independent recommendation of suitability as an Authorised Person.
- Better documentation, communication and enforcement of safe working procedures.

Contents

- You will revisit requirements of statutory regulation/legislation.
- High Voltage Safety Rules and Procedures.
- High Voltage equipment and protection.
- HV ring and radial systems.
- Operating records and documentation.

Exam

Learners complete exercises that involve the management, application and control of documentation.
Learners are continually assessed, both in knowledge and scenario exercises.
This course can be intense, it includes evening work, both the reading of course materials and completion of projects.
