

Helicopter Safety

Duration 15 Minutes

Target group Oil & Gas Industry

Prerequisites No prerequisites are required to sit this course.

Objective

- LO1: Understand how aviation is regulated
- LO2: Describe helicopter systems and equipment
- LO3: Describe the basics of aircraft maintenance and inspections
- LO4: Describe the different types of aircraft crew, their qualifications and training
- LO5: Understand a passenger's role in helicopter safety

Contents Helicopter safety has a good record in the UK, but accidents and fatalities still occur. As helicopters operate in often harsh conditions, particularly in the North Sea, safety is a top priority. Therefore, strict laws and regulations are in place.

Exam The assessment is taken during the course and is within the expected duration.
