

LBSRDL027

Water Management - Monitoring, Troubleshooting, Reporting and Docs

Duration 30 Minutes

Target group Oil & Gas Industry

Prerequisites No prerequisites are required to sit this course.

Objective LO1: Describe the trouble shooting methods for testing potable water
LO2: Identify the documentation used, the reporting requirements and the process to follow for recording information

Contents This course is aimed at Chief Engineers, Masters, 2nd Engineers, Chief Officers or similar.
This module – Monitoring, Troubleshooting, Reporting & Documentation – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module provides candidates with a clear understanding of the monitoring regimes and troubleshooting methods relevant to potable water, reporting requirements and an understanding of the necessary documents.

Exam The assessment is taken during the course and is within the expected duration.
