

## IADC WellSharp Driller Level Well Control (Surface)

<b>Duration</b>	5 Days
<b>Target group</b>	The IADC WellSharp “Well Control for Drilling Operations – for Drillers” course has been designed for anyone expected to shut-in a well, such as drillers and assistant drillers.
<b>Prerequisites</b>	Prior IWCF or IADC certification at Introductory or Driller Level is recommended but not mandatory. The training is role-specific so previous experience in an assistant driller or driller role during drilling operations is assumed. Please contact us to discuss candidate suitability if you have any doubts or queries.
<b>Objective</b>	The IADC WellSharp Driller Level Well Control course is essential training for those currently working in a role that is expected to shut-in a well. The course aims to reinforce and improve the candidate’s existing knowledge and appreciation of the various stages of shutting-in a well; from kick detection to shutting in the well, to monitoring once the well is shut in and monitoring the well-kill operation.
<b>Contents</b>	<p>The course is delivered over 5 days through presentation of a series of interactive lectures supported by videos and animations, supplemented by a classroom workbook and further self-study exercises and practical work on a drilling simulator.</p> <p>Under the WellSharp programme and unlike IWCF training, IADC Driller Level candidates are taught completely separately from IADC Supervisor Level candidates and will not be in a mixed class. The course ends with an online assessment on the final day which will be administered by IADC and invigilated by an independent proctor.</p>
<b>Exam</b>	<ul style="list-style-type: none"><li>- 3-hour online assessment</li><li>- Practical assessment</li></ul> <p>Successful completion of the course and a pass mark of 75% or above in the practical simulator assessment and the online written assessment will result in IADC WellSharp Driller Level certification which is valid for two years.</p>
