

OSE031

Helicopter Underwater Escape Training (with Emergency Breathing System)

Duration 1 Day

Target group All personnel who intend to travel to and from offshore installations and vessels via helicopter and will be required to use the rebreather EBS during an emergency situation.

Prerequisites There are no training pre-requisites for this course, however, delegates must be aged 16 years or over and have a good grasp of the English language.

Objective The objective of this course is to provide all delegates with knowledge and understanding of helicopter flight procedures with a particular focus on emergency situations.

Contents The HUET with EBS training covers the following areas:

- Pre-flight and in-flight procedures
- Actions to be taken in the event of an emergency ditching
- Ability to escape from a helicopter that has capsized or submerged in water
- Deployment and use of the rebreather emergency breathing system

Exam The course is a mix of both practical and theoretical learning and delegates are required to demonstrate their knowledge and understanding of the course contents throughout the training. Upon completion of the course, delegates will be awarded with an OPITO-approved HUET with EBS certificate. Certification is valid for 4 years at which time delegates will be required to repeat their HUET with EBS training to remain certified.
