

## GWO Working at Height and Manual Handling Combined

<b>Duration</b>	2 Days
<b>Target group</b>	Those operating in or wishing to operate in the wind energy sector.
<b>Prerequisites</b>	WINDA ID, English Speaking, Physically Fit, General Harness/Weight Restrictions
<b>Objective</b>	<p>If you're looking to start or develop your career in the renewable and wind energy industry and gain a Global Wind Organisation accreditation, then look no further! The GWO Working at Height &amp; Manual Handling Combined course provides each participant with awareness through theoretical and practical training. It is a requirement that offshore workers hold a valid, in date Working at Height &amp; Rescue certificate. This certificate can be refreshed every 2 years by completing the Working at Height Refresher course.</p>
<b>Contents</b>	<p>"This GWO Working at Heights &amp; Manual Handling training course covers the techniques and procedures which may need to be carried out in emergency situations when working at height when either alone or working as part of a team.</p> <p>The training deals with all aspects involved when working at height on wind farm projects, and ensures learners are taught the importance of the following procedure and regulations whilst working in hazardous environments.</p> <p>Our center is fully equipped with real-world training environments designed to make sure you are comfortable carrying out emergency procedures whilst working from height. Additionally, you can also book your Offshore Medical tests and checks with us!"</p>
<b>Exam</b>	Delegates will complete a practical and written multiple choice assessment as part of the GWO Working at Height & Rescue course.
