

OBSBE005

Familiarization S-cape descending device

Duration 1 hour

Target group People who work on offshore installations which are equipped with the S-Cape personal descending system.

Prerequisites Being a supplementary training the same prerequisites will be required as for the training it is combined with.
No extra prerequisites are required.

Objective The S-cape familiarisation training is developed to familiarise people with the workings of the S-cape descending system. The training is a practical oriented training and the aim is that delegates are able to make an independent descent with the S-cape descending system.

Contents

During the training the delegates will be explained:

- The reason for this system
- Storage and descend points offshore
- All the elements of the S-cape descending system
- Workings of the S-cape descending system (by demonstration)

The delegate will practise and demonstrate:

- Donning of the S-cape descending system
- A descend by using the S-cape descending system
- A descend by using the S-cape descending system in combination with a liferaft painterline

Exam The assessment will be done during the practical exercises by visual observations and oral questioning if needed.

This training is based on a tailor-made standard.
Delegates who successfully complete the training will receive a RelyOn Nutec certificate.
