

OBSRDL040

Fundamentals of Lithium-Ion Cells and Batteries

Duration	45 Minutes
-----------------	------------

Target group	Oil & Gas Industry (Onshore & Offshore)
---------------------	---

Prerequisites	No prerequisites are required to sit this course.
----------------------	---

Objective	LO1: Give an overview of the history of batteries LO2: Explain how a battery works LO3: Explain the structure and function of lithium-ion batteries LO4: Describe the different types of lithium battery LO5: List some examples of incidents involving batteries LO6: Explain the hazards associated with the use of batteries LO7: Explain the hazard symbols and packaging labels used with batteries LO8: Explain how to work with batteries safely LO9: Explain what to do in an incident involving batteries LO10: Explain how to safely dispose of batteries LO11: List the legislation and regulations relevant to batteries
------------------	--

Contents	The aim of this course is to introduce delegates to the fundamentals of lithium and ion-cell batteries, including how batteries operate, the associated hazards, symbols and labelling, and how to work with batteries safely.
-----------------	--

Exam	The assessment is taken during the course and is within the expected duration.
