

OBS2022

Helicopter Underwater Escape Training(HUET) with Compressed Air Emergency Breathing System(CA-EBS)

Duration

1 day

Target group

The OPITO-approved Helicopter Underwater Escape Training incl. CA-EBS (HUET) is intended for personnel traveling to oil and gas installations by helicopter. If you want to pay a short visit (one day) to an offshore installation, this is often the minimum requirement. In this one-day training the students are prepared for traveling with a helicopter (preflight and in-flight and basic training on emergency procedures) and escaping from a helicopter that has fallen into the water.

The CA-EBS training takes place in water in accordance with mutual recognition between Oil & Gas UK (OPITO) and NOGEPA.

Prerequisites

For attending the training the delegate should be:

- Possess of a valid ID (passport or drivers licence) - Possess a valid, current offshore medical certificate or

(b) Possess an employing company approved medical certificate equivalent to an offshore medical certificate, or

(c) On arrival at the training scenter you will be asked to complete a

medical self-declaration form.

- The delegate should have done a longfunctiontest or Spirometry test. The medical certificate should be send to our

customer service prior the date of the training. In case you do not have a spirometry test, this could be done on our training center before the

training.

- Training activities contained within this course may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capable of

participating fully.

Objective

The objective of this course is to provide all delegates with knowledge and understanding of helicopter flight procedures with a particular focus on emergency situations.

Contents

Helicopter Safety and Escape CA-EBS Outcome 1: Helicopter Travel

Outcome 2: Helicopter Emergencies

Outcome 3: Use of Compressed Air Emergency Breathing System (CA-EBS) Outcome 4: Use of Compressed Air Emergency Breathing System (CA-EBS)

Outcome 5: Practical Helicopter Escape Techniques Outcome 6: Additional CA-EBS Training (In-Water)

Exam

The course is a mix of both practical and theoretical learning and delegates are required to demonstrate their knowledge and understanding of the course contents throughout the training.

Upon completion of the course, delegates receive an OPITO approved HUET with CA-EBS certificate.

Certification is valid for 4 years at which time delegates will be required to repeat their HUET with CA-EBS training to remain certified.

Note: Training activities contained within this course may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capable of participating fully.
