

OBSMX001

Tropical Basic Offshore Safety Induction and Emergency Training

Duration 3 days

Target group This Product is to meet the initial offshore safety and emergency response training requirements for personnel new (or returning) to the offshore oil and gas industry in a tropical environment

Prerequisites No training prerequisites are required, however medical entry requirements must be met. Training activities contained within this Product may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capable of participating fully. Trainees will undergo a medical screening by completing an appropriate medical declaration form at center.

Objective The objectives of the T-BOSIET Training are that learners will be able to:

- a) Identify the generic hazards which are specific to offshore oil and gas installations, potential risks associated with those hazards, and how controls are put in place to eliminate or reduce risks.
- b) Identify key offshore related safety regulations and explain the basic safety management concepts.
- c) Demonstrate, in a simulated environment, that they can use the safety equipment, and follow procedures in preparing for, and during helicopter emergencies with particular focus on escaping from a helicopter following ditching.
- d) Demonstrate sea survival and first aid techniques.
- e) Demonstrate that they can effectively use basic firefighting equipment, and practice self-rescue techniques in low visibility situations, including smoke filled areas.

Contents The following topics will be covered during the course:

1. Basic Safety Induction.
 2. Helicopter Safety and Escape Training.
 3. Sea Survival.
 4. Basic First Aid.
 5. Fire Fighting and Self-Rescue.
 6. TEMPSC (Totally Enclosed Motor Propelled Survival Craft).
-

Exam To achieve the T-BOSIET training, the learners will need to complete the 4 mandatory T-BOSIET
