

IADC WellSharp Well Servicing Wireline

Duration	5 days
Target group	The course has been designed for wireline personnel including Field Engineers, Senior Field Engineers, and Supervisors (Cased Hole/Open Hole/Pip Recovery/Production Logging/TCP)
Prerequisites	Prior IWCF or IADC certification is recommended but not mandatory. The training is role-specific so previous experience in wireline operations is assumed. Please contact us to discuss candidate suitability if you have any doubts or queries.
Objective	The IADC WellSharp Well Servicing Wireline course is essential training for those primarily responsible for wireline operational processes of well control.
Contents	<p>The course duration is 32 classroom hours plus an IADC assessment (4 days of training and an exam on day 5). Training is delivered through presentation of a series of interactive lectures supported by videos and animations, supplemented by a classroom workbook and further self-study exercises.</p> <p>The 5-day course ends with a 3.5-hour online assessment on the final day which will be administered by IADC and invigilated by an independent proctor.</p>
Exam	Successful completion of the course and a pass mark of 70% in the online written assessment will result in IADC WellSharp certification which is valid for two years.
