

Bridging Elements Training

Duration	5 Hours
Target group	Personnel who have undergone training in OPITO Tropical BOSIET/FOET and require the extra elements to bridge the gap between the Tropical BOSIET/FOET and OPITO BOSIET/FOET
Prerequisites	<p>Personnel must have previously completed a Tropical BOSIET or Tropical FOET and hold valid certificates for these courses.</p> <p>ITEMS TO BRING: All delegates must bring Photographic I.D. and PASSPORT only (original or copy)</p> <p>HEALTH: All delegates will be asked to complete a medical questionnaire prior to course commencement</p>
Objective	This training programme is designed to bridge the differences between the Tropical BOSIET/FOET and the BOSIET/FOET. This includes use of transit type survival suits and emergency breathing systems during helicopter evacuation and escape
Contents	<p>Delegates will receive theoretical and practical knowledge in the following areas:</p> <ul style="list-style-type: none">- Donning a transit type survival suit, aviation lifejacket and emergency breathing system equipment.- Operation and use of emergency breathing system equipment during pool exercises.- Actions in preparation for a helicopter ditching.- Actions following a ditching on water, responding and reacting to scenarios both partially submerged and capsized.- In-water survival techniques.
Exam	<p>Persons successfully completing the bridging modules will be issued with an OPITO certificate for BOSIET or FOET and the details will be registered with the industry database.</p> <p>The validity of the OPITO certificate is four years.</p>
