- LO10: Explain the trailing hand technique

Contents

The aim of this course is to provide you with an overview of the legislation associated with slips trips and falls, and how these hazards impact the offshore industry. You will also be able to identify potential hazards, both at home and in the workplace, and be able to describe how to reduce such hazards.

Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or "unscheduled" refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.

Exam The assessment is taken during the course and is within the expected duration.
