

OBSMY054

Further Offshore Emergency Training (FOET) with Compressed Air Emergency Breathing System (CA-EBS) (OPITO Approved)

Duration	1 Day
Target group	This programme is designed to meet the further offshore safety and emergency response training requirement for personnel working in the offshore oil and gas industry who will be supplied with a compressed air emergency breathing system (CA-EBS) during offshore helicopter travel.
Prerequisites	All delegates must be in possession of a valid medical certificate and a valid (in-date) OPITO approved BOSIET (with CA-EBS), BOSIET, TBOSIET, FOET (with CA-EBS), FOET or TFOET certificate.
Objective	The aim of the FOET (with CA-EBS) is to provide the delegates with the opportunity to practise and demonstrate emergency response skills which are not possible to practise during drills exercises and emergency training offshore..
