

## OSPMY135

## **API RP 2D Rigger Safety Training**

and lifting operations, including crane lifting and required to gain certification as a qualified Rigger in accordance to API RP 2D.  Prerequisites  All delegates must be in possession of a valid medical certificate.  During the course delegates will raise their level of awareness on safe rigging practices to be utilized by riggers based on the API RP 2D 7th Edition. This course will provide the delegate with information on the various items (rigging equipment and gear) with which he/she will comcontact and practices that must be performed while performing rigging duties.  Contents  •Work to reduce rigging accidents  •Describe proper rigging procedures  •Show familiarity with the regulations and standards relative to rigging estate criteria for evaluating and inspecting rigging gear  •Identify equipment and rigging gear used by riggers  •Demonstrate correct hand signals		
and lifting operations, including crane lifting and required to gain certification as a qualified Rigger in accordance to API RP 2D.  Prerequisites  All delegates must be in possession of a valid medical certificate.  During the course delegates will raise their level of awareness on safe rigging practices to be utilized by riggers based on the API RP 2D 7th Edition. This course will provide the delegate with information on the various items (rigging equipment and gear) with which he/she will common contact and practices that must be performed while performing rigging duties.  Contents  Work to reduce rigging accidents  Describe proper rigging procedures  Show familiarity with the regulations and standards relative to rigging state criteria for evaluating and inspecting rigging gear  Identify equipment and rigging gear used by riggers  Demonstrate correct hand signals  Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater that equal to 60 degrees)  Perform a pre-lift rigging hardware and sling inspection	Duration	2 days
Objective  During the course delegates will raise their level of awareness on safe rigging practices to be utilized by riggers based on the API RP 2D 7th Edition. This course will provide the delegate with information on the various items (rigging equipment and gear) with which he/she will come contact and practices that must be performed while performing rigging duties.  Contents  •Work to reduce rigging accidents •Describe proper rigging procedures •Show familiarity with the regulations and standards relative to rigging state criteria for evaluating and inspecting rigging gear •Identify equipment and rigging gear used by riggers •Demonstrate correct hand signals •Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater that equal to 60 degrees) •Perform a pre-lift rigging hardware and sling inspection	Target group	This course has been developed for personnel directly involved in rigging and lifting operations, including crane lifting and required to gain certification as a qualified Rigger in accordance to API RP 2D.
rigging practices to be utilized by riggers based on the API RP 2D 7th Edition. This course will provide the delegate with information on the various items (rigging equipment and gear) with which he/she will composed to and practices that must be performed while performing rigging duties.  Contents  •Work to reduce rigging accidents  •Describe proper rigging procedures  •Show familiarity with the regulations and standards relative to rigging state criteria for evaluating and inspecting rigging gear  •Identify equipment and rigging gear used by riggers  •Demonstrate correct hand signals  •Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater that equal to 60 degrees)  •Perform a pre-lift rigging hardware and sling inspection	Prerequisites	All delegates must be in possession of a valid medical certificate.
<ul> <li>Describe proper rigging procedures</li> <li>Show familiarity with the regulations and standards relative to rigging</li> <li>State criteria for evaluating and inspecting rigging gear</li> <li>Identify equipment and rigging gear used by riggers</li> <li>Demonstrate correct hand signals</li> <li>Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than equal to 60 degrees)</li> <li>Perform a pre-lift rigging hardware and sling inspection</li> </ul>	Objective	rigging practices to be utilized by riggers based on the API RP 2D 7th Edition. This course will provide the delegate with information on the various items (rigging equipment and gear) with which he/she will come in contact and practices that must be performed while performing rigging
•Show familiarity with the regulations and standards relative to rigging •State criteria for evaluating and inspecting rigging gear •Identify equipment and rigging gear used by riggers •Demonstrate correct hand signals •Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than equal to 60 degrees) •Perform a pre-lift rigging hardware and sling inspection	Contents	•Work to reduce rigging accidents
<ul> <li>State criteria for evaluating and inspecting rigging gear</li> <li>Identify equipment and rigging gear used by riggers</li> <li>Demonstrate correct hand signals</li> <li>Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than equal to 60 degrees)</li> <li>Perform a pre-lift rigging hardware and sling inspection</li> </ul>		•Describe proper rigging procedures
<ul> <li>•Identify equipment and rigging gear used by riggers</li> <li>•Demonstrate correct hand signals</li> <li>•Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than equal to 60 degrees)</li> <li>•Perform a pre-lift rigging hardware and sling inspection</li> </ul>		•Show familiarity with the regulations and standards relative to rigging
<ul> <li>Demonstrate correct hand signals</li> <li>Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than equal to 60 degrees)</li> <li>Perform a pre-lift rigging hardware and sling inspection</li> </ul>		<ul> <li>State criteria for evaluating and inspecting rigging gear</li> </ul>
<ul> <li>Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than equal to 60 degrees)</li> <li>Perform a pre-lift rigging hardware and sling inspection</li> </ul>		<ul> <li>Identify equipment and rigging gear used by riggers</li> </ul>
equal to 60 degrees)  •Perform a pre-lift rigging hardware and sling inspection		•Demonstrate correct hand signals
. 55 5		•Demonstrate lift set ups (vertical, basket, choker, 2/4 part greater than or equal to 60 degrees)
•Practice rigging safety		<ul> <li>Perform a pre-lift rigging hardware and sling inspection</li> </ul>
		•Practice rigging safety
