

LBSRDL027

## Water Management - Monitoring, Troubleshooting, Reporting and Docs

---

**Duration** 30 Minutes

---

**Target group** Oil & Gas Industry

---

**Prerequisites** No prerequisites are required to sit this course.

---

**Objective** LO1: Describe the trouble shooting methods for testing potable water  
LO2: Identify the documentation used, the reporting requirements and the process to follow for recording information

---

**Contents** This course is aimed at Chief Engineers, Masters, 2nd Engineers, Chief Officers or similar.  
This module – Monitoring, Troubleshooting, Reporting & Documentation – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module provides candidates with a clear understanding of the monitoring regimes and troubleshooting methods relevant to potable water, reporting requirements and an understanding of the necessary documents.

---

**Exam** The assessment is taken during the course and is within the expected duration.
