

OBS411

DONUT Basic User

Duration	4 hrs
Target group	Donut is a simple lightweight personal descent device, designed to assist an evacuee to escape under control from height, either directly to sea or as a guided descent to a liferaft when conventional means of escape are unavailable or inoperable.
Prerequisites	None
Objective	Incorporating the principles of the Basic Familiarisation course with the inclusion of practical descents from a height, this provides the delegate with full knowledge and confidence in the use of the Donut System during an emergency evacuation
Contents	Training in the use of the DONUT personal descent device.
Exam	The delegates will be assessed against the learning outcomes. The course assessment is carried out by the instructor being satisfied of individual's competencies through questioning, observation and the use of the control measure form.
