

## Helicopter Safety

---

**Duration** 15 Minutes

---

**Target group** Oil & Gas Industry

---

**Prerequisites** No prerequisites are required to sit this course.

---

**Objective** LO1: Understand how aviation is regulated  
LO2: Describe helicopter systems and equipment  
LO3: Describe the basics of aircraft maintenance and inspections  
LO4: Describe the different types of aircraft crew, their qualifications and training  
LO5: Understand a passenger's role in helicopter safety

---

**Contents** Helicopter safety has a good record in the UK, but accidents and fatalities still occur. As helicopters operate in often harsh conditions, particularly in the North Sea, safety is a top priority. Therefore, strict laws and regulations are in place.

---

**Exam** The assessment is taken during the course and is within the expected duration.
