

OSE141

Coxswain adaption incl/ref to FF1200

Duration	1 day
Target group	Coxswains manning the FF1200 lifeboat. Refresher course for coxswains within maritime and offshore industries. The course covers the guidelines on refresher courses from Norwegian Oil and Gas for coxswains on floating and fixed installations.
Prerequisites	Basic safety training. Coxswain basic course on skid, free fall or conventional lifeboat.
Objective	The course aims to convert the coxswain from manning free fall, skid or conventional lifeboats to the FF1200. Upon completion of the course, delegates should have maintained and developed their knowledge, skills and attitudes towards their role in the emergency response team.
Contents	Conversion to the FF1200. A representative selection of the content on the coxswain basic course, adapted to the delegates prior knowledge, with focus on practical training. Turning around a life raft (STCW).
Exam	None.
