| <b>Duration</b>      | 30 Minutes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Target group</b>  | Oil & Gas Industry                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Prerequisites</b> | No prerequisites are required to sit this course.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Objective</b>     | LO1: Define risk assessment, hazards, controls and risks<br>LO2: Explain and describe the hierarchy of controls<br>LO3: Describe the concepts and techniques of risk assessment<br>LO4: Describe the steps of a typical risk assessment<br>LO5: Explain how to use a risk matrix<br>LO6: Describe additional elements of the risk assessment process<br>LO7: Explain how management of change can cause and prevent injury in the industry<br>LO8: Understand the purpose of risk intervention systems<br>LO9: Explain how to safely carry out an intervention<br>LO10: Explain the importance of reporting and lessons learned |
| <b>Contents</b>      | The course is available in the following languages: English; Norwegian; Turkish<br>A hazard is anything that has the potential to cause harm. This could mean harm to you or others, damage to property or harm to the environment.<br>Risk is the likelihood of that harm occurring.                                                                                                                                                                                                                                                                                                                                           |
| <b>Exam</b>          | The assessment is taken during the course and is within the expected duration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
