Introduction to Solar Installation (Roof Mount)

Duration 1 Day

Target group The Introduction to Solar Installation Training qualification is ideal for entry-level positions in the industry, such as labouring on a Solar site. The course is also perfect for existing construction workers or electricians who are looking to up-skill and learn more about photovoltaic panels and their application on roof installations.

Prerequisites Physically/medically fit. Delegates must have a basic level of reading and writing in order to complete the course and must provide valid photographic ID such as a Passport or Driving Licence. The course is run in English and as such you must have an appropriate level of fluency in order to participate. Course material is provided.

Objective Introduction to Solar Installation Training qualification teaches delegates all the skills and safety qualifications required to work on a domestic or commercial Solar PV site for roof installations.

Contents "•Introduction to Solar Energy and the sector (Theory)
•Overview of legislation (Theory)
•Working at Height (CTS In-house)
•Harness Awareness (CTS In-house)
•Basic install techniques (Practical)"

Exam Assessments undertaken for Work at Height and Harness Awareness Elements
