

Hand Safety - OSHA Standards

Duration 25 minutes

Target group Oil & Gas Industry
29 CFR 1910.138

Prerequisites No prerequisites are required to sit this course.

Objective

- LO1: Understand the importance of hand safety
- LO2: List the common causes of hand injuries
- LO3: Describe work related hand and finger injuries
- LO4: Explain the different treatments for hand and finger injuries
- LO5: Describe the hierarchy of controls
- LO6: Explain how to avoid hand injuries during lifting activities
- LO7: Explain how to select, use and care for gloves

Contents

The course is available in the following languages: US English; Turkish; Spanish.

This course has been designed to provide an awareness of how, and why, a wide variety of hand related injuries can occur in the workplace. You will also learn how to treat specific injuries, along with practical advice on how to prevent them from occurring in the first place.

Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or "unscheduled" refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.

Exam The assessment is taken during the course and is within the expected duration.
