

## ECITB TECSKILLS (RESKILLS RIGGING) ECITB

<b>Duration</b>	5 weeks
<b>Target group</b>	The course has been designed to make training more accessible both for new starters to the industry and for existing skilled and semi skilled craftspersons to develop their skills.
<b>Prerequisites</b>	There are no pre requisites for this course
<b>Objective</b>	Moving loads involves familiarisation with all items of rigging equipment and attachments and preparing equipment for lifting and planning lifts. It also involves carrying out simple and complex lifting and moving operations of large components. The course will be ran over a five week period and will include both theoretical and practical training and assessments.
<b>Contents</b>	<p>Week 1:</p> <p>Introduction to Training &amp; Assessment Centre            Introduction to Lifting Operations &amp; Safe Systems of Work            Introduction to Practical Training &amp; Assessment Area            Introduction to Lifting Equipment &amp; Accessories            Correct Selection of Lifting Equipment &amp; Accessories            Introduction to simple lifting operations            Harness &amp; Working at Height Awareness            Introduction to Lift Planning</p> <p>Week 2:</p> <p>Basic Lift Planning, TBT's &amp; TRA's            Weight Estimation of Loads            Correct selection of Lifting Equipment &amp; Accessories            OPITO Stage 1 Rigger Training (3 Days)            Cross hauling of complex loads</p> <p>Week 3:</p> <p>Rigging Loft Management            Cross hauling of complex loads</p> <p>Week 4 :</p> <p>COSHH Awareness            PUWER Awareness            GPA Simulation (during complex lifting operation)            Cross hauling of complex loads</p> <p>Week 5:</p> <p>SCQF Level 5 VQ Update and completion            RIDDOR Awareness            LOLER Powerpoint introduction            Cross hauling of complex loads</p>
<b>Exam</b>	<p>CBQ/SCQF L5 Learner Competency Outcome:</p> <p>A minimum of 6 complex lifting operations per learner, the learner will plan and execute a minimum of 6 complex lifting operations as a team leader, if the learner has not shown 'off the job' competency by simulation at level 5 after completing 6 complex lifting operations, additional lifts will be included in the learners CBQ/SCQF candidate portfolio until</p>

---

competency has been confirmed at this level by direct observation as carried out by the assessor.

On successful completion of the training and assessment the learners will leave the centre with the following qualifications and certification:

ECITB Level 5 CBQ Certification in Supporting Engineering Construction Activities

OPITO Rigger Training Stage 1 Certificate

Course are conducted at RelyOn Nutec training centres at Aberdeen and Teesside
