

Water Management - Hazard and Risk Mitigation

Duration 30 Minutes

Target group Oil & Gas Industry

Prerequisites No prerequisites are required to sit this course.

Objective LO1: Identify the key hazards that can affect potable water
LO2: Explain the health risks that can arise from the poor management of water and why they happen
LO3: Additional Risk Mitigation

Contents This awareness course is aimed at 2nd Engineers, Chief Officers, Medics or similar.
This module – Hazards and Risk Mitigation – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module describes key hazards affecting potable water, the potential health risks as a result of these hazards and additional risk mitigations to prevent illness.

Exam The assessment is taken during the course and is within the expected duration.
