

Plant Manager / Incident Commander Initial Response Training

Duration 4 Days

Target group The target group for Plant Manager/Incident Commander Initial Response Training is personnel who are either designated as being in charge of, are members of, or provide support to an incident management team in an emergency.

Prerequisites There are no specific prerequisites for the Plant Manager/Incident Commander training and assessment programme.

Objective The aim of the Plant Manager/Incident Commander Training is to equip personnel with formal training in command, control, communications and stress-related factors in the management of major emergencies. In addition, this programme also provides initial emergency incident management training for personnel who are undertaking a training and competence programme to progress to the role of a Plant Manager/Incident Commander. This course can be delivered for onshore O&G or petrochemical facilities, refineries and top tier COMAH sites.
