

RBSRDL021

Stroke Awareness for Wind Energy

| Duration | 30 minutes |
|---------------|--|
| Target group | Personnel who will be working in the wind industry or related fields, and will carry out their duties in a wind turbine environment, usually in physical contact with a wind turbine or offshore wind structure. Personnel that perform job functions that have been risk assessed by their employer or workplace, where training according to one or more modules of the BST standard may mitigate the identified risks. |
| Prerequisites | No prerequisites are required to sit this course. |
| Objective | LO1: What are strokes and why do they occur? LO2: Causes and types of stroke LO3: Symptoms of a stroke LO4: How you can help if you recognise that someone is having a stroke LO5: Stroke treatment and recovery LO6: Stroke prevention |
| Contents | The aim of this course is to provide an overview of what strokes are and why they occur. You will learn about stoke causes, symptoms, treatment and recovery and preventative measures, as well as what to do if you encounter someone on or offshore who is having a stroke. |
| Exam | The assessment is taken during the course and is within the expected duration. |
