Water Management - Hazard and Risk Mitigation

Duration	30 Minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Identify the key hazards that can affect potable water LO2: Explain the health risks that can arise from the poor management of water and why they happen LO3: Additional Risk Mitigation
Contents	This awareness course is aimed at 2nd Engineers, Chief Officers, Medics or similar. This module – Hazards and Risk Mitigation – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module describes key hazards affecting potable water, the potential health risks as a result of these hazards and additional risk mitigations to prevent illness.
Exam	The assessment is taken during the course and is within the expected duration.
