

OBS2022

Helicopter Underwater Escape Training (HUET) with Compressed Air Emergency Breathing System (CA-EBS)

Duration	1 day
Target group	<p>The OPITO-approved Helicopter Underwater Escape Training incl. CA-EBS (HUET) is intended for personnel traveling to oil and gas installations by helicopter. If you want to pay a short visit (one day) to an offshore installation, this is often the minimum requirement. In this one-day training the students are prepared for traveling with a helicopter (preflight and in-flight and basic training on emergency procedures) and escaping from a helicopter that has fallen into the water.</p> <p>The CA-EBS training takes place in water in accordance with mutual recognition between Oil & Gas UK (OPITO) and NOGEPa.</p>
Prerequisites	To participate in the training, the participant must be in possession of a valid offshore medical certificate with a statement that it is safe for the delegate to participate in shallow water CA-EBS training.
Objective	The objective of this course is to provide all delegates with knowledge and understanding of helicopter flight procedures with a particular focus on emergency situations.
Contents	<p>Helicopter Safety and Escape CA-EBS</p> <p>Outcome 1: Helicopter Travel</p> <p>Outcome 2: Helicopter Emergencies</p> <p>Outcome 3: Use of Compressed Air Emergency Breathing System (CA-EBS)</p> <p>Outcome 4: Use of Compressed Air Emergency Breathing System (CA-EBS)</p> <p>Outcome 5: Practical Helicopter Escape Techniques</p> <p>Outcome 6: Additional CA-EBS Training (In-Water)</p>
Exam	<p>The course is a mix of both practical and theoretical learning and delegates are required to demonstrate their knowledge and understanding of the course contents throughout the training.</p> <p>Upon completion of the course, delegates receive an OPITO approved HUET with CA-EBS certificate.</p> <p>Certification is valid for 4 years at which time delegates will be required to repeat their HUET with CA-EBS training to remain certified.</p>
