| Target group  | Everyone who is designated to act as a crew member of a Fast Rescue Craft at an offshore mining installation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Prerequisites | No training prerequisites are required.<br>Persons enrolling on this course must be able to show a valid offshore<br>medical certificate prior to participating in practical exercises.<br>A note of caution for people with fear of height or a tendency for<br>seasickness / motion sickness:<br>Participation in this course can prompt symptoms thereof.                                                                                                                                                                                                                                                                                                                                                                                             |
| Objective     | As a team member of the Man Over Board Emergency Response Team<br>your duty will be to rescue persons out of the water in the vicinity of the<br>offshore installation. Man Over Board situations can vary from a person<br>who falls overboard, a helicopter ditch or an abandonment situation. The<br>Man Over Board Emergency Response Team can also be requested by the<br>Netherlands Coastguard to assist in a Search And Rescue operation.<br>The objective is to train the delegates in the theory and practice of<br>determining the state of readiness and launching operations. Taking on<br>board and handling of the MOB boats which are used on board offshore<br>installations and the performance of rescue operations with these boats. |
| Contents      | The training will consist of the following learning targets:<br>- Check the state of maintenance and readiness of the MOB boat<br>- Basic concepts of good seamanship, determine a course and steer by<br>compass, operate equipment on board the MOB boat<br>- Recovery and transport of a victim from the water<br>- The execution of all procedures associated with launching, recovery and<br>MOB rescue operations<br>- Take command in all situations that arise concerning the rescue of<br>persons who have fallen overboard<br>- Search pattern with navigational aids e.g. compass, PLB, homing device,<br>GPS equipment<br>- Capsize drill                                                                                                    |
| Exam          | Delegates will be assessed against the learning outcomes specified in the<br>NOGEPA training handbook chapter 2.3 Coxswain Fast Rescue Craft by<br>using direct observation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
