Refresher Coxswain Fast Rescue Craft (NOGEPA 2.3B)

Duration	1 day
Target group	Everyone who is designated to act as a crew member of a Fast Rescue Craft at an offshore mining installation.
Prerequisites	Valid certificate 2.3A or 2.3B. Persons enrolling on this course must be able to show a valid offshore medical certificate prior to participating in practical exercises. A note of caution for people with fear of height or a tendency for seasickness / motion sickness: Participation in this course can prompt symptoms thereof.
Objective	The objective is to train the delegates in the theory and practice of determining the state of readiness and launching operations. Taking on board and handling of the MOB boats which are used on board offshore installations and the performance of rescue operations with these boats.
Contents	The training will consist of the following learning targets: - Check the state of maintenance and readiness of the MOB boat - Basic concepts of good seamanship, determine a course and steer by compass, operate equipment on board the MOB boat - Recovery and transport of a victim from the water - The execution of all procedures associated with launching, recovery and MOB rescue operations - Take command in all situations that arise concerning the rescue of persons who have fallen overboard - Search pattern with navigational aids e.g. compass, PLB, homing device, GPS equipment
Exam	Delegates will be assessed against the learning outcomes specified in the NOGEPA training handbook chapter 2.3 Coxswain Fast Rescue Craft by using direct observation.
