

RBS202

GWO Slinger Signaller

Duration	2 days
Target group	Personnel working within the wind industry conducting slinging techniques and signalling during simple lifting operations, meaning lifts conducted based on a lifting plan covering known hazards.
Prerequisites	All personnel participating in the Slinger Signaller training module shall be medically fit and capable of fully participating. Specifically, the delegates must be made aware of the risks and hazards related to completing this course.
Objective	The aim of GWO's Slinger Signaller training module is to enable the delegate to support and care for themselves and others while working with slinger signalling in the wind industry by possessing the required knowledge and skills to conduct assigned tasks safely and efficiently. Upon successful completion of GWO's Slinger Signaller training course, the delegate will be able to work within the wind industry conducting slinging techniques and signalling during simple lifting operations, meaning lifts conducted based on a lifting plan or covering known hazards.
Contents	Content Lesson 1; General Safety Introduction Lesson 2; General Theory Roles and Responsibilities and equipment Lesson 3; Practical handling and equipment Lesson 4; Summery and final test
Exam	Delegates will be assessed by means of direct observation and supplementary oral questions where appropriate (formative evaluation). Furthermore, the delegate will be subjected to written phase tests after the theory elements, and again after the close of the training course. (Summative evaluation) The written tests can consist of multiple choice or descriptive answer questions and shall be set at the same taxonomy level as the objective that they are testing. There shall be at least one question for each lesson in the module.
