

RFI201

Fire Awareness (GWO)

Duration ½ day

Target group The Basic Safety Training (BST) is designed to provide personnel with the basic skills that will enable them to work in a safe manner in the wind industry and to meet emergency response training requirements for personnel new to the global wind industry. It is designed to accommodate personnel working both onshore and offshore.

Personnel working in the wind industry or related fields needing to obtain their GWO BST Fire Awareness module certificate.

Prerequisites No training prerequisite required for the Basic training.

Delegates participating in the GWO BST must be demonstrably medically fit and capable of fully participating.

Objective To create a safer working environment, RelyOnNutec provides personnel working in the wind industry with basic knowledge and skills during a Fire Awareness course. This module of the Basic Safety Training applies to the Global Wind Organisation (GWO) standards and offers theoretical and practical training for personnel in the wind industry.

The aims of this course are to give the participants the basic knowledge and skills through theoretical and practical training to prevent fires, conduct initial and appropriate judgement when evaluating a fire, manage evacuation of personnel to ensure all are safely evacuated and accounted for in the event of an unmanageable fire, and, if it is judged to be safe, to efficiently extinguish an initial fire by using basic hand held fire fighting equipment.

WINDA is the global database which is used by the Global Wind Organisation (GWO). WINDA will make verification of training possible for training providers and employers. Delegates will have ownership of their own training records in WINDA.

Participants will no longer be issued with paper certificates. RelyOnNutec will upload a digital record of the GWO certificate in WINDA. If you are participating in a GWO training course you must register for a delegate profile in WINDA. After registration you will receive a WINDA ID. You need this WINDA ID to book the training. Without a WINDA ID we are not able to produce certificates. To register for a delegate or organisation profile, please visit: winda.globalwindsafety.org.

Contents All learning outcomes which are stated in the GWO BST Module Fire Awareness

To include:

- Global and national legislation
- Fire combustion and fire spread
- Fire extinction
- Fire prevention
- Fire fighting equipment in a Wind Turbine
- Scenario based practical exercises

Exam

The delegates will be assessed against the learning outcomes.

The course assessment is carried out by the instructor being satisfied of individual competencies through questioning, observation and the use of the control measure form.
