

Course code	LBSRDL016
Course name	Onshore Basic Spill Responder - Digital Learning
Duration	90 Minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Describe the Working Environment LO2: Explain Spills and How We Can Prevent Them Occurring LO3: Identifying Spills LO4: Describe Adsorbents LO5: Describe Spill Kits LO6: Identify the Steps of Spill Response LO7: Interactive Exercise 1 - Responding to a Small Oil Spill LO8: Explain the Control of Substances Hazardous to Health (COSHH) LO9: Interactive Exercise 2 - Responding to a Small Chemical Spill LO10: Explain the Risk Assessment LO11: Interactive Exercise 3 - Placing Spill Kits
Contents	The course is suitable for all onshore employees and looks at how, why and where spills occur. The programme describes a safe step by step approach to spill response and explains how to assess the risk, identify the substance and select the correct PPE. Delegates can then put theory into practice using a range of interactive exercises and real-life scenarios in preparation for dealing with a variety of basic spills onshore.
Exam	The assessment is taken during the course and is within the expected duration.
