The course is available in the following languages: English; Brazilian Portuguese; Spanish; Norwegian; Bahasa Malay; Indonesian; Thai **Contents**

This course explains the legal requirements and the methods for managing waste produced by operations in the oil and gas industry. Minimising waste can deliver both business and environmental improvements. If our resources can be used more efficiently, then less waste will be produced, significantly reducing

the harm to the environment.

Exam This course is CPD approved. The assessment is taken during the course and

is within the expected duration.
