## Tropical FOET with Shallow Water CA-EBS

<b>Duration</b>	1 day
<b>Target group</b>	This Product is to meet the offshore safety and emergency response training requirements for personnel new (or returning) to the offshore oil and gas industry in a tropical environment and who require additional Compressed Air Emergency Breathing System (CA EBS) training.
<b>Prerequisites</b>	<p>Training entry and medical entry requirements must be met. The T-FOET is open to persons who have a valid (in-date) OPITO-approved BOSIET, BOSIET (with CA-EBS), TBOSIET, FOET, FOET (with CA-EBS) or TFOET certificate.</p> <p>Training activities contained within this Product may include physically demanding and potentially stressful elements.</p> <p>All personnel who participate in such activities must be capable of participating fully. Trainees will undergo a medical screening by completing an appropriate medical declaration form at center.</p>
<b>Objective</b>	<p>The objectives of the T-FOET Training are that learners will be able to:</p> <ul style="list-style-type: none"> <li>a) Demonstrate, in a simulated environment, that they can use the safety equipment and follow procedures in preparing for and during helicopter emergencies with particular focus on escaping from a helicopter following ditching.</li> <li>b) Demonstrate that they can use basic firefighting equipment effectively, and use self-rescue techniques in low visibility and completely obscured visibility situations e.g. smoke filled areas.</li> <li>c) Demonstrate that they can perform basic first aid.</li> </ul> <p>The objectives of the additional CA-EBS training delivered in conjunction with the TFOET program are to:</p> <ul style="list-style-type: none"> <li>a) Demonstrate, in a simulated environment, that they can use the safety equipment and follow procedures in preparing for and during helicopter emergencies with particular focus on escaping from a helicopter following ditching.</li> <li>b) Demonstrate that they can use basic firefighting equipment effectively, and use self-rescue techniques in low visibility and completely obscured visibility situations e.g. smoke filled areas.</li> <li>c) Demonstrate that they can perform basic first aid.</li> <li>d) Ensure learners are familiar with the use of the Compressed Air Emergency Breathing System (CAEBS).</li> <li>e) Ensure that learners understand their basic emergency response actions during a helicopter emergency using the CA-EBS.</li> </ul>

---

**Contents**

The following units covered during this course are:

1. Further Helicopter Safety and Escape – Tropical
2. Helicopter Emergencies with Use of Compressed Air Breathing System
3. Further Firefighting and Self Rescue
4. Further Emergency First Aid

---

**Exam**

The learners will need to complete the 3 mandatory T-FOET units and the 1 CA-EBS mandatory unit.
