

## OSEMX010

Exam

## **Tropical HUET with Shallow Water CA-EBS**

And gas industry in a tropical environment and who require additional Compressed Air Emergency Breathing System (CA EBS) training.  Prerequisites  No training prerequisites are required, however medical entry requirements must be met. Training activities contained within this Product may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capab of participating fully. Trainees will undergo a medical screening by completing an appropriate medical declaration form at center.  Objective  The objectives of the T-HUET Training are that learners will be able to:  a) Demonstrate, in a simulated environment, that they can use the saf equipment, and follow procedures in preparing for, and during helicopte emergencies with particular focus on escaping from a helicopter following ditching.  b) Demonstrate sea survival techniques.		
training requirements for personnel new (or returning) to the offshore of and gas industry in a tropical environment and who require additional Compressed Air Emergency Breathing System (CA EBS) training.  Prerequisites  No training prerequisites are required, however medical entry requirements must be met. Training activities contained within this Product may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capab of participating fully. Trainees will undergo a medical screening by completing an appropriate medical declaration form at center.  Objective  The objectives of the T-HUET Training are that learners will be able to:  a) Demonstrate, in a simulated environment, that they can use the saf equipment, and follow procedures in preparing for, and during helicopte emergencies with particular focus on escaping from a helicopter following ditching.  b) Demonstrate sea survival techniques.  The objectives of the additional CA-EBS training delivered in conjunction with the T-HUET program are to:  a) Ensure learners are familiar with the use of the Compressed Air Emergency Breathing System (CAEBS)  b) Ensure that learners understand their basic emergency response actions during a helicopter emergency using the CA-EBS  The following topics will be covered during the course:  1. Helicopter Safety and Escape Training 2. Correct use of CA-EBS 3. Sea Survival	Duration	1 day
requirements must be met. Training activities contained within this Product may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capab of participating fully. Trainees will undergo a medical screening by completing an appropriate medical declaration form at center.  Objective  The objectives of the T-HUET Training are that learners will be able to:  a) Demonstrate, in a simulated environment, that they can use the saf equipment, and follow procedures in preparing for, and during helicoptemergencies with particular focus on escaping from a helicopter followin ditching.  b) Demonstrate sea survival techniques.  The objectives of the additional CA-EBS training delivered in conjunction with the T-HUET program are to:  a) Ensure learners are familiar with the use of the Compressed Air Emergency Breathing System (CAEBS)  b) Ensure that learners understand their basic emergency response actions during a helicopter emergency using the CA-EBS  The following topics will be covered during the course:  1. Helicopter Safety and Escape Training 2. Correct use of CA-EBS 3. Sea Survival	Target group	training requirements for personnel new (or returning) to the offshore oil and gas industry in a tropical environment and who require additional
a) Demonstrate, in a simulated environment, that they can use the safe equipment, and follow procedures in preparing for, and during helicopte emergencies with particular focus on escaping from a helicopter following.  b) Demonstrate sea survival techniques.  The objectives of the additional CA-EBS training delivered in conjunction with the T-HUET program are to:  a) Ensure learners are familiar with the use of the Compressed Air Emergency Breathing System (CAEBS)  b) Ensure that learners understand their basic emergency response actions during a helicopter emergency using the CA-EBS  The following topics will be covered during the course:  1. Helicopter Safety and Escape Training 2. Correct use of CA-EBS 3. Sea Survival	Prerequisites	requirements must be met. Training activities contained within this Product may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be capable of participating fully. Trainees will undergo a medical screening by
1. Helicopter Safety and Escape Training 2. Correct use of CA-EBS 3. Sea Survival	Objective	<ul> <li>a) Demonstrate, in a simulated environment, that they can use the safety equipment, and follow procedures in preparing for, and during helicopter emergencies with particular focus on escaping from a helicopter following ditching.</li> <li>b) Demonstrate sea survival techniques.</li> <li>The objectives of the additional CA-EBS training delivered in conjunction with the T-HUET program are to: <ul> <li>a) Ensure learners are familiar with the use of the Compressed Air Emergency Breathing System (CAEBS)</li> <li>b) Ensure that learners understand their basic emergency response</li> </ul> </li> </ul>
	Contents	1. Helicopter Safety and Escape Training 2. Correct use of CA-EBS 3. Sea Survival

To achieve the T-HUET CA-EBS Training the learners will need to complete the 2 mandatory T-HUET units and the 1 CA-EBS mandatory unit.
