Scaffolding Awareness - OSHA Standards

Duration	60 minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Describe what a scaffold is and why it is used LO2: Define the key terms used in the construction of scaffolds LO3: Recognize the basic components of a scaffold LO4: Describe the key elements of a scaffold LO5: Identify the different types of scaffolding structures LO6: List the basic tools used in the construction of a scaffold LO7: List the requirements for access to scaffolds LO8: Identify hazards associated with the use of scaffolding LO9: Describe the PPE requirements for scaffolding LO10: Identify the responsibilities of key personnel involved with scaffolding LO11: Describe the use of the scafftags system LO12: Describe the importance of scaffold inspections
Contents	The course is available in the following languages: US English; Spanish; Bahasa Malay; Indonesian; Thai; Turkish. The aim of this course is to give you an awareness of scaffolding components and procedures. You will learn about the basic tools used to construct scaffolds, the personal protective equipment required, the roles and responsibilities associated with scaffolding work, and the importance of inspections. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or “unscheduled” refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.
Exam	The assessment is taken during the course and is within the expected duration.
