Outcome: The principles of a Safety Management System

Outcome: Principles and Objectives of a PTW system and how permits are generated

Outcome: Personal responsibility in the PTW system

Unit 5 (OIS-252) - Helicopter Safety

Outcome: Key principles of and roles in Helicopter Safety

Contents

This OPITO Minimum Industry Safety Training (MIST) Further Online Training course is specifically designed for experienced offshore workers operating in the UK oil and gas industry.

The aim of this online course is to enable candidates to retain an awareness of the major accident hazards, workplace hazards and associated controls to be found on offshore installations. Candidates are required to demonstrate their knowledge and understanding across the following key areas:

Major Accident Hazards , Workplace Hazards and Personal Safety , Risk Management , Control of Work , Helicopter Safety.

Exam

Candidates are required to sit a pre-assessment to allow them to demonstrate their knowledge and understanding of the course content against each of the learning objectives. This online version will automatically highlight any knowledge gaps and provide the option to review relevant, or all, content before retaking a customised assessment. A pass mark of 100% is required to successfully complete the course.
