Water Management - Monitoring, Troubleshooting, Reporting and Docs

Duration	30 Minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Describe the trouble shooting methods for testing potable water LO2: Identify the documentation used, the reporting requirements and the process to follow for recording information
Contents	This course is aimed at Chief Engineers, Masters, 2nd Engineers, Chief Officers or similar. This module – Monitoring, Troubleshooting, Reporting & Documentation – is part of a comprehensive Water Management programme. There are four modules in total which can also be completed separately by job role. This module provides candidates with a clear understanding of the monitoring regimes and troubleshooting methods relevant to potable water, reporting requirements and an understanding of the necessary documents.
Exam	The assessment is taken during the course and is within the expected duration.
