

<b>Course code</b>	LBSRDL022
<b>Course name</b>	Helicopter Safety
<b>Duration</b>	15 Minutes
<b>Target group</b>	Oil & Gas Industry
<b>Prerequisites</b>	No prerequisites are required to sit this course.
<b>Objective</b>	LO1: Understand how aviation is regulated LO2: Describe helicopter systems and equipment LO3: Describe the basics of aircraft maintenance and inspections LO4: Describe the different types of aircraft crew, their qualifications and training LO5: Understand a passenger's role in helicopter safety
<b>Contents</b>	Helicopter safety has a good record in the UK, but accidents and fatalities still occur. As helicopters operate in often harsh conditions, particularly in the North Sea, safety is a top priority. Therefore, strict laws and regulations are in place.
<b>Exam</b>	The assessment is taken during the course and is within the expected duration.
