## **T-BOSIET/FOET to BOSIET/FOET - Bridging Element Training**

<b>Duration</b>	1 Day
<b>Target group</b>	Personnel who have undergone training in OPITO's Tropical BOSIET/FOET and require the extra elements to bridge the gap between the Tropical BOSIET/FOET and OPITO's BOSIET/FOET.
<b>Prerequisites</b>	Personnel must have previously completed the OPITO Tropical BOSIET or Tropical FOET training, and hold valid certificates for these courses.
<b>Objective</b>	This Training Programme is designed to bridge the differences between the Tropical BOSIET/FOET and the BOSIET/FOET. This includes use of aviation transit suits and emergency breathing systems (EBS) during helicopter evacuation and escape.
<b>Contents</b>	<ul style="list-style-type: none"><li>• EBS Theory and Demonstration</li><li>• Use of Emergency Breathing System (EBS)</li><li>• Practical Helicopter Escape Techniques</li><li>• Donning an aviation transit suit, aviation lifejacket and emergency breathing system equipment (EBS) and conducting EBS integrity checks.</li></ul>
<b>Exam</b>	Delegates will be assessed using direct observation.
